RAJALAKSHMI
ENGINEERING
COLLEGE

# CS23332 DATABASE MANAGEMENT SYSTEMS LAB

**Laboratory Record Note Book**

Name : P. M. Arunesh

Year / Branch / Section : 2025 / CSE - Cyber security

University Register No. : 211624190 1007

College Roll No. : 241901007

Semester : III

Academic Year : 2024 - 28

RAJALAKSHMI
ENGINEERING COLLEGE
An AUTONOMOUS Institution
Affiliated to ANNA UNIVERSITY, Chennai

# BONAFIDE CERTIFICATE

NAME P.M. Arunesh

ACADEMIC YEAR 2024-28 SEMESTER 3rd BRANCH CSE - Cyber Security

UNIVERSITY REGISTER No. 211624901007

Certified that this is the bonafide record of work done by the above student in the

Database management System Laboratory during the year 2025 - 2026

Signature of Faculty - in - Charge

Submitted for the Practical Examination held on .....

Internal Examiner

External Examiner

# INDEX

Name : P.M.Arunesh Branch : CSE-CS Sec : A Roll No : 2241901007

| S.No. | Date | Title | Page No. | Teacher's Sign / Remarks |
|---|---|---|---|---|
| 1. | 16/7/25 | Creating & managing table | 1 | |
| 2. | 16/7/25 | Manipulating data | 7 | |
| 3. | 17/7/25 | including constraints | 17 | |
| 4. | 23/7/25 | writing basic SQL SELECT statement. | 26 | |
| 5. | 24/7/25 | Restricting & sorting data | 34 | |
| 6. | 30/7/25 | single row function | 45 | |
| 7. | 31/7/25 | Displaying data from multiple table | 61 | |
| 8. | 7/8/25 | Aggregating data using group function | 70 | |
| 9. | 13/8/25 | Sub Queries | 83 | |
| 10. | 14/8/25 | Creating Queries | 91 | |
| 11. | 20/8/25 | using the set operators | 99 | |
| 12. | 3/9/25 | Not Null & UNIQUE constraints. | 141 | |
| 13. | 17/9/25 | Creating queries | 149 | |
| 14. | 18/9/25 | other database object | 158 | |
| 15. | 24/9/25 | Controlling User Access | 163 | |
| 16. | 25/9/25 | PL/SQL | 171 | |
| 17. | 25/9/25 | control structure. | 172 | |
| 18. | 8/10/25 | Procedure & function | 192 | |
| 19. | 9/10/25 | Trigger | 199 | |
| 20. | 15/10/25 | Mango DB | 220 | |

Program 1

Write a code in PL/SQL to develop a trigger that enforces referential integrity by preventing the deletion of a parent record if child records exist.

```
CREATE OR REPLACE TRIGGER trg_prevent_parent_delete
BEFORE DELETE ON department
FOR EACH ROW
DECLARE
    v_count NUMBER;
BEGIN
SELECT COUNT(*) INTO v_count FROM employee
WHERE
    dept_id = :OLD.dept_id;
IF v_count > 0 THEN
    RAISE_APPLICATION_ERROR(-20001, 'cannot delete parent record. Child records exists in employee table');
END IF;
END;
```

Program 2

Write a code in PL/SQL to create a trigger that checks for duplicate values in a specific column and raises an exception if found.

```
CREATE or replace trigger trg_check_duplicate_email
insert or update on students:

FOR EACH ROW

Declare
    v_count NUMBER;

BEGIN
    SELECT count(*) INTO v_count FROM students WHERE
    email = NEW.email
    IF v_count > 0 Then
        Raise_Application_Error(-20002, 'Duplicate email
    duplicate each email must be unique';

    END if;

END
/
```

Program 3

Write a code in PL/SQL to create a trigger that restricts the insertion of new rows if the total of a column's values exceeds a certain threshold.

```
CREATE OR Replace trg trigger trg_check_
total salary
BEFORE INSERT ON Employees
FOR Each ROW
DECLARE
    v_total Number;
    v_threshold constant Number := 10000;
BEGIN
    SELECT NVL(sum(salary),0) INTO v_total from
    Employees;
IF (v_total + :NEW.salary) > v_threshold THEN
RAISE_APPLICATION_ERROR(-20003, 'Total salary exceeds
                                    allowed threshold';
END IF;
END;
/
```

Program 4

Write a code in PL/SQL to design a trigger that captures changes made to specific columns and logs them in an audit table.

```
CREATE table employee_audit
    emp_id NUMBER;
    Old_salary NUMBER.
    NEW_salary NUMBER.
    change_date DATE;
    Changed_by. VARCHAR2(30)
);
CREATE OR REPLACE Trigger trg_audit_salary_change
AFTER update of salary on employee
For each Row
BEGIN
    INSERT INTO employee_audit (emp_id, old_salary,
    NEW salary, change_date, changed_by)
    values (:old.emp_id, :old.salary :- NEW salary,
    SYSDATE, USER)
END;
/
```

Program 5

Write a code in PL/SQL to implement a trigger that records user activity (inserts, updates, deletes) in an audit log for a given set of tables.

```
Create table activity_log (
    table_name Varchar(30),
    Operation_type Varchar(20)
    user_name Varchar(30)
    activity_date DATE
);
Create or Replace Trigger trg_user_activity
AFTER INSERT OR UPDATE or delete on employee
BEGIN
    INSERT INTO activity_log (table_name,
    Operation_type, user_name, activity_date)
    VALUES ('EMPLOYEE', 'ORA_SYS_SESSION_USER',
    SYSDATE);
END;
/
```

Program 7

Write a code in PL/SQL to implement a trigger that automatically calculates and updates a running total column for a table whenever new rows are inserted.

```
Create Table sale (
    sale_id NUMBER
    amount NUMBER
    running_total NUMBER);
CREATE OR REPLACE TRIGGER trg_update_
                          running_total

After insert ON sales
for each row
declare
    v_total Number;

BEGIN
    select NVL(Sum(amount), 0) INTO v_total
                               FROM sales;

update sales SET running_total = v_total
        WHERE sale_id
        = : NEW.sale_id;

END;
/
```

Program 8

Write a code in PL/SQL to create a trigger that validates the availability of items before allowing an order to be placed, considering stock levels and pending orders.

```
Create or replace Trigger trg_check_stock_
availability
Before INSERT ON orders
for each Row
declare
    v_stock Number;
BEGIN
    SELECT quantity_in_stock INTO v_stock
                             FROM inventory
    WHERE item_id = : NEW.item_id;
    IF v_stock < : NEW.order_quantity THEN
    RAISE_APPLICATION_Error (-20004, 'Insufficient
                stock available
            for the required item);
    END IF;
END;
```
